Consideration of additional information to inform the proposed approach

Outstanding questions about implementation

5. Next steps (Shannon)

For those attending via telephone conference:

Not Responsive

Parking and Building Access

The entrance on the north side of the MPCA building (520 Lafayette Rd, St. Paul) is being renovated and there is no public access to the building through these doors. Since this entrance is not available, meeting attendees will need to **enter through the temporary MPCA entrance**, which is located in between the MPCA and DNR buildings off the small parking lot in front of the DNR building (see the red star on the map). Once inside the building, please stop and register your vehicle (make and license plate number) with the guards at the temporary station just inside the entrance. The guards will also have name tags for those attending the meeting. After checking in, please follow the hallway to the left past the cafeteria and take a left to get to the MPCA elevators. Take the elevators to the 6th floor and then take a right to get to the meeting rooms, which will be on the left.

Parking options: A) MPCA main visitor parking in north lot (blue rectangle on map) B) visitor parking lot indicated by parking "2" on the map (one block away); C) visitor over-flow parking in the area marked "3" (2.5 blocks away)

Note: If you park in any of these locations you must register your vehicle (make and license plate number) with the guards at the temporary station just inside the entrance. Also, the parking lot marked as "1" is the MDNR short term visitor lot. Parking in this lot will **not** be available for the meeting except to accommodate handicap parking needs.

MPCA main visitor parking
